Dear Friend

Before I walk you through on this journey of finding jobs and ending unemployment in your life, first know that there are four basic requirements you need to have in other to secure a job or best get your dream job in less than 21 days, using this book

3

Yes in less than 21 days of using this book **How To Find Job**, believe me, you will find a job and escape unemployment forever. So without wasting your time,

below are the basic requirements you need to make available before starting your job hunt using this book

- 1: You Need A Good CV (Resume)**
- 2: Your Need A Bank Account or Paypal Account**
- 3: Education Qualification (Not That Important)**
- 4: You Need A Skill or Skills, Very Important**

I will take my time to details how you can get these requirements in the subsequent pages. so relax yourself, in case you don't have any of the requirements

But first, **Take Note:**

I am not an English teacher, this statement goes to the grammar perfectionist, please this book **How To Find Job**, is to guide you in finding a job, Having Multiple Streams Of Incomes and to Self Inventory, helping you Becoming An Employer Of Labour.

So don't expect my English to be 100% perfect, in fact, in some cases, I may use this or these, will or would and much more. Pardon me. This book is about finding jobs not the use of English. Hope you understand.

Am **Mbonu Watson C**, By the special grace of God am a Developer/Internet Marketer and Writer

The CEO Of **NL_SOFT**, Owner's of www.nairalearn.com, www.advert.ng, www.smsafrica24.com. and My Personal tech blog @ www.mbonuwatson.com

Yes, Am A Full-Time Digital Marketer. I Develop Websites, Mobile App, I write, Teach and blog for a living

Am a proudly Nigerian, find me at home or abroad, anywhere in the world I represent my home country Nigeria, I love my country I no go lie, started my Ntreprenuer career from my country home Nigeria, wrote these book first edition right from my country home.

The Nigeria as a failed country, the Nigeria with no jobs, no electricity, no public portable water, corruption everywhere. A Country blessed with both human and mineral resources

Yet her over 140 million out of 190 million citizens go to bed daily hungry and jobless. As was reported on the World Bank ranking 2019. You can visit <http://datatopics.worldbank.org/world-development-indicators/> official World Bank page On World Development Indicators for more information about this ranking.

Back to **How To Find Job**, as I said earlier, you will need a good CV (Resume) a simple design and a well-formatted soft copy. Due this report does not cover how to write, design and format a simple CV because I assume most of you already have a CV

But should you don't have a CV or need to update your CV simple WhatsApp this Mobile Number **08068608490** or **+2348099688839** using the word (CV Report) And am going to send you a download link to CV Report Template that you can simple re-edit, re-write, re-design and re-create your simple CV.

Having A Bank Account Or Paypal Account

5

The second requirement is having a **Bank account** or **Paypal account**, but let assume you already have a bank account, but if you don't. just walk into any of the Nigeria Banks, that is if you are in Nigeria and request for bank account opening.

mind you, you can as well open a bank account online from any of the Nigeria banks website or mobile app

But should you don't want to use Nigeria banks, you can also use Virtual bank, here is a link <https://nairalearn.com/top-7-free-virtual-credit-card-providers/> where I have detailed how to open a virtual bank account and for those who don't understand what A Virtual Banks Is

A Virtual Bank is also known as Direct bank

A **virtual/direct bank** is a bank without any branch network that offers its services remotely via online banking and telephone banking and may also provide access via ATMs, mail, and mobile. Virtual/Direct banks reduce the significant costs of maintaining a branch network and you can have one by going to this link <https://nairalearn.com/top-7-free-virtual-credit-card-providers/>

On The PayPal Account:

Having said that, now on the PayPal Account. Know that you cannot open a PayPal account that receives funds from anywhere in the world as a Nigerian using PayPal Nigeria URL, But here <https://nairalearn.com/how-to-create-a-paypal-account-that-sends-and-receives-money-in-nigeria-guide/> I have also made provision on How You Can Create A Paypal Account That Sends And Receives Money In Nigeria From Any Part Of The World.

Or best Whatsapp These Mobile Numbers 08068608490 or +2348099688839 in other to get a copy of the PayPal Report. ***So That Settles The Second Requirement On How To Find Job In Less Than 21 Days using this book***

WHY DO I NEED A PAYPAL, Some May Ask?

Answer: You will need a PayPal account because this book **How To Find Job** focus more on how you can find jobs from the International market. That is 70% of

the information here covers how you can find Jobs from the International market and 30% covers how you can find jobs from my country Nigeria.

And please hear this. You do not need to leave outside Nigeria in other to find jobs from the international market, as I will show you how to live in Nigeria and find jobs from the international market as well be making cool cash in foreign currency.

Yes, that is to say, you can live in my home town Neni In Anambra state or where ever you are in Nigeria and find Jobs in the International Market, Be it jobs in USA, jobs in UK, jobs in CHINA, jobs in CANADA, Jobs in Dubai, jobs in South Africa, jobs in Ghana the list goes on and on, yes you can live in Nigeria and find jobs from any of this country of your choice. The basic requirement is for you to have an internet connection, mobile phone or best personal computer. I will go into more detail on this in the subsequent pages. for now, let proceed to the third requirement

Third Requirement On How To Find Job

7

Education Qualification (Not That Too Important) because this requirement is not that much important, due if your focus is finding jobs in Nigeria alone. Then consider this to be important in some cases

Lately more people in Nigeria believe that Education (~~School Na Scam~~) my brother I no blame them, but please don't join these categories of people in believing such, they may have proved their point which is ok to them, but believe me, school is not a scam, and can never be a scam, in other words, school is important. just that in this part of the world called Nigeria. our educational system is not helping, no thanks to the Corrupts Nigeria Government of all time.

So I have nothing much to say about this requirement, only but to say congrats to those that have certificates, if you don't have a certificate relax. This is 21 century, we are in a time where certificate doesn't matter, what matters is the value you can offer to the world or best what can you do, what problems can you solve.

So we are moving over to the final requirement on [How To Find Job](#), hope you are with me, if yes. Let keep going

Forth Requirement

You Need A Skill or Skills, Very Much Important. In fact, this is one of the reasons why there are hug unemployment in my country Nigeria as 70% of Nigerians that are opportune to go to school are busy chasing certificates upon certificates, you can't help but blame the educational system

You hear the educational system, telling them to study very hard, I was also told to get a good result, get the certificates and enter the labor market. The Nigeria Labour Market of no jobs, depression and death trap.

8

I was once told that getting a good grade is a 100% sure way of getting a good job, maybe my dream jobs in Nigeria. But las las. you and I know that the system, both the Educational system and the Nigeria Government lied to us.

These are reason whenever there is job opening and recruitment in Nigeria, millions of unemployed youth are always affected as you can see in this picture below

But don't worry, the situation on the above picture is not your portion, so don't be scared as I have solutions to this and I will discuss vividly how you can get jobs in less than 21 days leveraging skills (Self-inventory) with certificates or no certificates, you will escape the unemployed community in Nigeria after reading the book.

Yes having both educational certificates and skills is cool, but believe me. in this era of 21-century skills speaks louder than paper certificates, am not saying that certificates are not good but believe me you will find jobs faster leveraging the power of your skills

9

For those who may be telling themselves now, How about us who do not have skills, let me quietly explain what I mean by skills

There are two types of skill this is my personal view irrespective of what every other person and school of thought defined skill as

To me **Mbonu Watson**, There are two types of skills (My personal view)

1: The **Inborn** qualities: are natural ones (skills) which you are born with. for example!! Mr. Mbonu had an **inborn** talent for languages. and also the **ability** to smile etc are all **inborn qualities**.

2: Learned skills: these are the skills you acquired by learning. Etc for example! Mbonu Watson Learn Programming and today he is a developer.

So you see, in all we all have skills, so if you are still telling yourself that you don't have the skills, I believe this my explanation should prove you wrong. We all have skills and the ability to learn new skills also but it is up to you to decide if you are ready to acquire a new skill and escaping unemployment for life. Is all up to you to decide what is good for you

Often a time a lot of job hunters joke with their career knowing too well that every human being on earth consume, so there are the possibilities that every human being on earth spends money daily, a human being can be a liability or an asset, it's left for an individual to choose what he or she becomes, while the wise chose to become an asset, the foolish ones chose to remain as a liability.

In all, I wish that you become an asset after reading this book because, In today's world, he or she who gets hired is not necessarily the one who can do that job best; but, the one who knows the most about how to get hired. So your first assignment here is learning the best ways you can get hired faster

Yes learning best ways you can get hired fast

If you learn new advanced job-hunting skills, you can not only survive. You can thrive on both the local jobs market here in Nigeria and that of the **gig economy** from the international market. The rest of this book is devoted to showing you exactly how to do that.

I know some of you may be asking What is **Gig Economy** as opposite to traditional work, and for the benefits of those who don't know, let me make a brief definition of what Gig Economy stands. due I will be discussing more about the gigs economy in the subsequent pages, but let me make a brief here

The Gigs Economy

The gig economy is the shift towards replacing full-time employees with independent, short contractors. It can also be referred to as Temporary work or temporary employment where the working arrangement is limited to a certain period based on the needs of the employing organization; it can also be referred to as the alternative work arrangement, multiple streams of income or primary job.

And here is what the majority of job hunters don't know:

There are **hundreds, thousands to millions** of vacancies on **Gig Economy** daily all over the globe, and in this 21st century, to get job leveraging gigs economy is as easy as ABCD, as you can get jobs in hours, days, weeks and make cool cash at ease

11

That is to say, you can be in Nigeria, be a Nigerians and get a job locally here in Nigeria or International from any country of your choice including the united

state, Canada, China. I Mean any country of your choice, yes you can get legitimate jobs in less than 21 days working right from your country home

I know some of the questions, still pumping up in your mind now are: ***How is that possible?***. RELAX we are just starting our journey on **How To Find Job. So you too soon discover how possible it's**

If you are reading this book and you are broke, jobless, underemployed or completely unemployed, just relax, there is hope for you

You see even in the U.S 36 percent of the U.S workers are in the gig economy, which works out to a very large number of approximately 67 million people now in the United State alone.

With the rise of Uber, Lyft, Etsy, Amazon, Mechanical Turk, Freelancer.com, Ebay, Alibaba, JV Zoo, Fiverr, CPA Network, Classified Ads and others, more and more workers are doing part-time work, side hustles, as they are often called, and are joining the **“Gig Economy”** as it is more formally known.

Essentially, for many, it is when you are between full-time jobs or cannot find a new job after a layoff, or just need more flexibility than a traditional job can provide. So, you go freelance and string together jobs on a short-term, contract basis.

Technology is a big enabler of this mode of freelance work – with a smartphone, pc, and with fast wifi and a power outlet) – you can work from just about anywhere. Am going to show you How, as we proceed

You see I count myself in this category as I have been self-employed for most of my life. Whether you will make enough to provide a living wage is another story. Many do, but quite a few do not. But I wish you do, cus that is the primary aim of this book

The gig economy is aimed at the entrepreneurial thinker looking for ideas. Self-inventory in other words and this book aim to provide resources and ideas to get my follow Nigerians started on **Gigs Economy**. To those who want to pursue a side hustle or more.

So if you want to join the gig economy as a side hustle, or as a startup and get jobs faster, beat the unemployment market, here are few things you need.

1: Your Need Skill or Acquired skills

2: You Need To Gig Your Skill. That is listing your skills to the world

3: You Need The **Digital Marketing Academy Kit**: You need It to understand how the gigs economy work in a live step by step video kit, as for The **Digital Marketing Academy Kit**, You Can Get It By Clicking Here <https://nairalearn.com/course/digital-marketing-academy-ecourse/>

I Will discuss the above topic and how to get them in the subsequent pages, but before then, remember to find your dream jobs means work, it means you in a person getting up and start working smarter on how to find jobs using this book

Yes to some people, dreams mean to stand up and work, not sleeping, get ready to get into actions and get things done, for finding a job these days is a job itself. You need to work smarter, plan smarter, prepare yourself smarter in other to find your dream jobs, YOU NEED TO GET PREPARED NOW. As there are best ways and worst ways to hunt for jobs and all you need is knowing the best ways to hunt and find jobs.

There are Best and Worst Ways to Look for Jobs, hunt for jobs nationwide and internationally may be two very different ways you can go about the job-hunt or a career change.

There's the way everyone tells you, you should hunt for work. Because that's the way it has always been done. Because that's the only way they know. This strategy has a name and I personally call it the *Updated Smart Traditional Approach To Job Hunt*.

Most of us know how to do this, or can quickly learn. It doesn't demand much time. You begin with the so-called job market. You look at the ad postings by employers, online and offline.

14

You approach those companies that look the least bit interesting to you. Wait to see if you get any responses. At the same time, you slap together a resume. Post it. Or send out bushel baskets of resumes to mailing lists.

If that doesn't turn up any job offer, send out another ton of resumes. Post your resume everywhere. If this all works for you, great!

But, if it doesn't work (for you), the good news is that there is a radically different second way to hunt for work or a career change.

Let's call it the Spartan Approach.

Here you begin, not with the job market but with yourself. You figure out who you are, and among all your gifts and skills which ones you most love to use.

Then (and only then) you go looking for organizations that match you. And you do not wait until they announce they have a vacancy. You approach them anyway, not through a resume but through a person, specifically a bridge-person—someone who knows you and also knows them, and therefore is a bridge between you two.

The opposite page has a detailed comparison of these two radically different strategies. If you've tried as hard as you can to find a job, and nothing is working, stop looking

For explanations the remedy is staring you in the face: you need to switch approaches. If you've been depending solely on the **Updated Smart Traditional Approach**—and it just isn't working this time—then you need to try using the **Spartan Approach**—

Sure, it's harder to use this approach.

Sure, it requires more of you. It's more work.

Sure, it asks you to do some hard thinking and reflect on who you are, and where you're going with your life.

But that is precisely its value. It's not just about jobs. It forces you to step back, and first think about your whole life. And what you want out of life. It begins with Who (are you) before considering

What (shall I do).

Who precedes What. and so on

These, then, are the two basic job-hunting or career-changing strategies that are at your command. But the first strategy—the **Updated Smart Traditional Approach**—can be broken down further.

Here are some comparative statistics. We'll start with the worst, and work our way up: from the ones with the poorest track record to the ones with the best. (Just remember, the figures here are not exactly scientific. It's a mash of actual studies I **Mbonu Watson** once saw, plus, where no studies have ever been done, my impressions fit in, I hope we are good to go. Let proceed

The Best and Worst Traditional Approaches to Looking for a Job

Looking for employers' job postings on the Internet. This method works on average just 4 percent of the time. Yeah, it works for just four out of every one hundred who try it.

You're somewhere between surprised and shocked at this finding? I was too. It is strange. If you're out of work, everyone will tell you the best way to look for a job is to look for employers' job-postings (vacancies)—either on the employer's own website (if the job-hunter or career-changer have a particular organization in mind); or on websites such as advert.ng, Nairaland.com career/ job section, vConnet, Finlab, jiji.ng job section, Monster, CareerBuilder, Indeed, Glassdoor, US. jobs, CareerArc, LinkedIn, Twitter, or Facebook; or even on non-job-sites such as the hugely popular Craigslist. remember, you don't limit your job hunting in Nigeria alone, you strive to leverage the international market

Job Hunt, Best Keywords You Can Use To Generate Employment Firms Database Worldwide:

16

These are only but a few places you can find work on the Internet and much there are keywords you can use to search employment firms in your country, state or

even city. Below is an example, you can use the keyword to search for a list of HR/Employment firms in any state in Nigeria.

Note this keyword search is not limited to Nigeria alone, as you can use it to search for employment firms from any countries of your choice and get a job faster

Here is an example of the keyword

“employment agencies in Lagos, TX”

To search for employment firms in your area. .eg just goto www.google.com and enter this keyword (*employment agencies in Lagos, TX*) and click go. Google will come up with a list of employment firms in your state as you can see on the image below

employment agencies in Lagos, TX

The list goes on and on and I believe by now you must have understood how to use the above keyword to search for employment firm in Nigeria, so use your brain and apply those keywords on google, get the list of employment firm in your targeted state or the city and hit them up with your CV. It works in some cases and can get your job in less than 21 days if done correctly and consistently. Haven said that let move on

USING UPDATED Smart Traditional Ways To Find Job Faster

This method is simple by asking for job-leads. This method works 33 percent of the time. With this method, *you ask family members, friends, and people* you know in the community, your home town. Your Village and as well the online community like **facebook, twitter** or on **LinkedIn** if they know of any job vacancies

You ask people simple questions like

Do you know of any place where someone with your talents, skills or educational qualification background is being sought? It is a simple question: e.g Do you know of any job vacancies at the place where you work—or elsewhere?

Using this method, you have an almost five times better chance of finding a job, than if you had just sent out your CV. **Take note** this method work like crazy, it can get you jobs in less than 21 days that is if you are willing to put shame aside and use it the smart way

This Is How It Work?

Assume you are from XYZ Village Or Town in Nigeria, all you need to do is to get your CV Ready, once your CV is ready, you need to proceed to Facebook and search for your village or town Facebook community Group and join the group or groups, you can also do same on twitter by searching for prominent members of your community on twitter and follow them, but on twitter, you may need to DM them, while on facebook group you may need to make your request known by making a public post to the online

community just by posting your job quest 'request' on the group

Once you have joined this group, remember the essence of facebook group and twitter is to network and hang out with group members, so once you have joined this group, you need to make yourself know by making a post introducing yourself to the group members and possibly let the group members know that you need a job. Don't be shy to make such posts because these methods work faster

Believe me, once you make a post on your community facebook group, upon seeing your post 60% of the group members will be willing to help, those that have job vacancies in their firm, place of work or knows someone who knows another person that has job vacancies may request for your CV. Be willing to forward your CV To them, as I said this method works faster and by you using it you may find jobs in less than 21 days

You can also apply same technique on Twitter, LinkedIn etc, but here you may likely use DM, To hunt for the job, while in some cases you may choose to go public just like @osulale_farouq who design and rebranded Innoson Vehicles #logo and choose to call them out using public twitter #tag, you can see the tag above.

20

And in less than 48 hours Innoson Vehicles @ Innosonvehicles responded. you can see the sample response post below

This method work like crazy that is if you in person is willing to put off shame and pride aside, and head to your community facebook group and inform them that you are looking for a job, apply the same method on Twitter and watch how you will get jobs in less than 21 days

Job-hunting is or should be a full-time job. If your job-hunt isn't working, you must increase the amount of time you're devoting to your job-hunt. Sometimes you may need to come public, as I said earlier, always put shame and pride behind once you are hunting for a job. Put shame and pride aside just as this corper by name *Stephen M. Teru* made his public. see sample post below

He came public on facebook to announce his personal CDS in other word made his skills and educational qualification know to the world

Here is what happened after his post went viral, in less than 48 hours, the media came calling for him, the Good willing Nigerians, Organizations, Companies and even the state Local Government Area where he served all came calling for him and guess what, Jobs came calling as well. Google and Wikipedia all came calling and indexed him positively on search

directories announcing him to the global world and the name *Stephen M. Teru* gain a positive review and ranking just with a single post that showcases his handwork (skill)

So in some cases, you may need to come public with whatever you have, what you can do or do, be it your skills or your educational qualification just come out and let the world know. Don't be jobless and stay calm, in reality, there is no shame in losing

This method works faster, so if you want to devote as little time to your job-hunt as possible, then fine; try this method. But if that doesn't lead to a job, then you are going to have to devote more time to it. if you want to explore this kind of work. While these opportunities represent short-term viral, in some cases may attract low-income jobs, it's always possible you'll meet someone who can help you find a better opportunity.

Using Your Friends, Family And Contact List.

Another smart way to hunt for a job is using your friends, family and contact list, this method is simple and is more of direct messaging. As I was writing this report and about to publish it more than 70% of my contacts lists are already waiting for it, why?

Why are there waiting, there are waiting for it, because I have already gone ahead on different occasions to make the announcement known to them using Facebook post, Twitter tags, Instagram and on my Whatsapp Status and many more

22

My case is not different to you hunting for job, just that on your case you need to let your contacts lists, your friends and family know that you are hunting for job, inform them in your language and usage of words, be it by text messages, facebook

post, WhatsApp status, etc. you can even go ahead using audio or even making videos to make your needs and wants to be known to them

No Shame and Pride In Hunting For Job. Make Your Need Known To People, Tell Them You Are Looking For Work. Remember Oyibo Called it a workshop, so no shame in letting your pride go

As we proceed, I will also reveal to you, other ways you can use to find local jobs in Nigeria faster. I will show you how to find jobs from the top Firms, Organizations, Companies, Business, Federal and state government jobs. But for now let discuss how to find jobs from the Gig Economy, HOW You Can Find Jobs From International Countries even when your living and based in Nigeria

Finding Jobs, Joining The GIG Economy: This is my best-recommended way of getting jobs quick. If you want to find jobs fast, not just finding jobs fast, but finding good jobs and living your dream life, the life of freedom.

Then you need to Join The GIG Economy using The Spartan Approach of finding Jobs online from any place in the world, be it Gigs Jobs or traditional jobs

You see. The reality is that Job-Hunting Has Moved More and More Online: From the earliest days of the Internet, there have been employment websites, commonly called “job-boards,” places where employers post vacancies that they are trying to fill.

23

Thousands of job-boards now exist, including advert.ng, Indeed.com, Glassdoor, LinkedIn. And many others locally and internationally

Job-boards can be broken down into the following categories:

Mega job-boards: and search engines that hunt for job vacancies—they scrub job-boards, companies, newspapers, or wherever, to find these. Indeed.com is the most famous worldwide, you can make a plan to visit www.indeed.com, you will love it, visit to observe what is going on the number one job board portal worldwide.

Take note: there are thousands to million job vacancies on www.indeed.com alone on weekly basis, due this jobs covers both locally listing jobs in Nigeria and more international jobs and Gigs, I too walk you through on how to secure jobs not only on www.indeed.com, but also on Amazon AWS <https://aws.amazon.com/>, www.fiverr.com and many more. Due you will need The **Digital Marketing Academy Kit** in other to improve your job hunt and career perspective to suit your dream jobs on the international market

www.proven.com is another great portal that provides a mega job-boards for a variety of industries on the Gigs Economy

If you remember, I told you earlier that I will reveal to you how you can live in Nigeria and secure jobs from the International market, well here are a few of my reasons why I am doing that, You see. In Nigeria My Country the reality remains that, finding good jobs in less than 21 days may be hard for some people, worst and impossible to many

This is not because there is corruption in Nigeria and the system here is too crude, so jobs are not been created or maybe because there is no infrastructure as more companies are living Nigeria Yearly, No these and many more are not the main reason.

The main reason I'm recommending you to get a skill and hunt for jobs in the international market is that 70% of the employed personals in Nigeria are underemployed, to them half bread is better than none and indeed its better.

Imagine the Minimum wage in Nigeria is about N 30,000 That is less than 90 USA dollars per month. I am a proudly Nigerian but believe me the working system here in Nigeria doesn't favour the masses, it only favour the government people in power, the corrupt politicians. May God Help The Poor Masses In Nigeria

So that is one reason am introducing you to **Gig Economy** and am recommending you give it a try. Just a try as there are more jobs vacancies in the International market, provided you are coming with clean mind and you are ready to learn the skills needed to get jobs from the GIGS ECONOMY WORLDWIDE, get works and keep delivering your works to your international clients, by so doing the money will keep calling to your bank account or PayPal fund without stress and guess what, this money will be coming in foreign currency, not in Naira.

32

Things You Need To Know About Software Engineer

The Software Engineer is one of the highly profitable coding industry. As coders and software engineers are now highly sought after and they make serious and innovative contributions to many different industries around the world. For this

reason, the option of making coding a serious career has become very popular. Many people learn to code and become software developers, often without even college degrees. Yes without even going to college

The software developing industry is known for being flexible, versatile, and lucrative. Further, there are even more benefits to working as a freelance coder, as opposed to committing to one job. So it is in your best interest to become a freelance software engineer. That is if you have an interest in becoming a software engineer.

One of the main advantages is that you have the opportunity to be completely flexible in terms of location. As a freelance coder, you will take on jobs as you please, and you won't be confined to any office space. This means that you can work wherever you want, be it a café, an office space, or even at home. This is very useful to software engineers, as they can work wherever innovation and creativity strikes. An office atmosphere can often feel suffocating and can restrict your creativity. As a freelancer, you won't have to worry about this.

Another reason for trying freelancing is independence. In addition to the location, you can also be very flexible with your work hours. The only requirement is that you get the work done by a certain deadline. This is useful so that you can make your coding hours work around the rest of your day. It is especially useful to those who prefer to work during the night, as opposed to the normal work times.

Working as a freelance coder can be very lucrative. This is because you won't be tied down to one project. For example, you can work as an app developer and website creator at the same time, consult experts like <https://mbonuwatson.com/>. This means that you will be receiving payment from as many projects as you can take on, and this will no doubt be very rewarding.

Independence comes about in other senses as well. For example, you have complete control over your projects. Although collaboration can be useful, sometimes your work may get taken over by seniors in the corporate world.

33

If you work freelance, you work alone, and you have complete control over your project. For example, if you are working on app development, you can take complete creative control and make the project yours. However, if you do wish to

engage with others, you can rent out a collaborative office space or join programming groups online. Essentially, the choice is yours.

As is clear, the overall benefit of working freelance is the flexibility and freedom of choice including working as an SEO service provider. You can do entire projects alone, be paid well, and be completely flexible in terms of location and work hours. For these reasons, you should consider the option of working as a freelance coder.

Should in case you have interest on learning Freelance Software Engineer then make plans in getting The Digital Marketing Academy Kit live From <https://nairalearn.com/> it will help you a lot on your learning process and as well revealing to you how you can list your Freelance Software Engineer Jobs and other career, skills jobs on GIGS Economy Boards worldwide

So haven said that, let return back to **How To Find Job** in Nigeria, Leveraging the few available jobs vacancies In Nigeria

How To Find Jobs In Nigeria Market

Before I start, have it in your mind that finding jobs in Nigeria can be very stressful sometimes, this is due to low job creation culture and lack of existing jobs maintenance in Nigeria, as I write to you more international/multinational companies doing business and productions in Nigeria are planning on how to leave the Country while some has left already.

Before now a lot of companies running business products in Nigeria have already closed up. While the Government of Nigeria are busy doing nothing, no job creation for her growing citizens, no existing jobs maintenance, this is not just happening in Nigeria alone, but to Africa as a continent

To them, the Government people running Africa countries, creating jobs for their growing citizens is a crime so the Job Quest among Africa Nationals became a survivor of the fittest and in other to beat the unemployment some Africa national has no choice but to leave they country home to another country all in the name of job hunting.

This brought about xenophobia in South Africa, The aliens must go In Nigeria, Ghana Must Go infamous bag. The job quest in Africa and how lack of jobs creates crisis among Africa Nationals

One reason why I decided to share these stories with you is to let you know that history already has it that in the year 2019, South Africa Government and her citizens ask other Africa National to leave there country and the majority of the affected people are my fellow Nigerians who left Nigeria due to hardship and lack of jobs.

Then came xenophobia

To them the South Africans, the foreign nationals are stealing their jobs, 80% of their jobs have been taken away by immigrants, to them this can't continue, South Africans can't surrender South Africa to foreign National, They Must Go, all the foreign national has to leave for them the South Africans to get back their jobs

To them their borders are being loose, it has let to foreigners taking jobs and as a result, South Africans don't have jobs' that's what they say

So because, south Africans are unemployed, and because they have a government with no solutions to the crisis of poverty and the widening gap between the rich and the poor, they begin to agitate that All Foreigners should go and that the ongoing xenophobic attack is caused by a lack of Jobs. And indeed it was lack of jobs

This has been part of a recurring incident in Africa

As back in 1969, the then Ghanaian Prime Minister, Kofi Busia, Invoke the Aliens compliance order and deported an estimated 2.5 million undocumented African migrants, the majority of whom were Nigeria.

35

To them the Ghanaian Government, The migrants are contributing nonsense and as well taking jobs that are meant for the citizens of Ghana, so they should leave Ghana in other for Ghanaian to find jobs. Nigerians and other African Nationals were forcefully expelled from Ghana due to a lack of jobs for the Ghanaians.

The lack of no job and quest for jobs among Africans national continue, as in the year 1958 Cote d'Ivoire deport African National, of which Togolese, Dahomeyans, and Nigerians were affected, the deportation was centered on aliens must go, to Cote d'Ivoire foreign nationals has taken over the jobs and there are jobless

And the quest for jobs among Africa National did not end there, as Nigeria Did the same to other African Nationals in the year 1983

That time everybody was going to Nigeria. There were jobs for all and money was available in Nigeria.” There was true. In 1958, Nigeria struck oil as a young, soon-to-be-liberated country with a population of 100-million then. First Shell came to Nigeria, then Mobil and Agip set up shop in the country to drill oil commercially, massive jobs were available for both Nigerians and other Nationals

The oil money was steady and hopes were high that Nigeria could prosper, despite the brutal military regimes that marred that period.

In the 1970s the economy exploded when oil prices soared worldwide. The golden decade had arrived and the country became Africa’s wealthiest, securing its title: **Giant of Africa**. By 1974 there were jobs everywhere

Nigeria’s oil wells were spitting out some 2.3-million barrels a day. The standard of living improved. There was an influx of people within Nigeria from all Africa National.

That! Recruiters from Nigeria went to Ghana looking for people who would like to teach or take up casual jobs — the jobs Nigerians themselves were unwilling to do.

And then came the oil crash. Global oil prices started to dip in 1982 when large consumer markets such as the United States and Canada slipped into recession and demand was low.

By 1983, the price of a barrel had fallen to \$29, down from \$37 in 1980. At around the same time, the US began producing its own oil, further cutting demand and causing excess supply. Nigeria, it's economy almost exclusively reliant on oil, was hard hit. By 1982, 90% of the country’s foreign reserves had been wiped out,

according to the Washington Post, the Nigeria corrupt leadership, the Government people has stolen all the money

Food prices skyrocketed and salaries became erratic. Poor policy decisions at the highest level of government only made things worse. Ghana's nightmare was being replayed in Nigeria. Nigeria started to turn inwards.

By 1982, politicians started to use words like "aliens" (Ghana Must Go) in their manifestos in preparation for the 1983 general elections. They blamed African migrants, especially Ghanaians, for the flailing economy. Ghanaians had taken all the jobs and brought crime to Nigeria and, if elected, they would chase them out, they promised.

It didn't take long for this animosity to spill over into relations between Nigerians and Ghanaians.

Then Comes The Announcement For All The Aliens (Ghana Must Go) in the early hours of January 17, 1983, By Then. The President of Nigeria, Shehu Shagari with an executive order mandating immigrants without proper immigration documents to leave the country or they would be arrested according to the law.

After the announcements, the hostilities had grown. Rumors spread that the government had ordered locals to beat up any illegal Ghanaian still in the country by the January 31 deadline.

That lead to the deportation of over 2 million Africans from everywhere else in Africa, including many from Ghana, taking everything away from them with the xenophobic slogan "all aliens must go". (Ghana Must Go)

To The Nigeria Government, the foreign nationals have taken over jobs meant for the Nigerians, so they have to leave for Nigerians to get jobs, so over 2 million Africans left Nigeria in 1983, only for the economy to collapse and Nigerians start seeking educational help, jobs from the same Ghanaians, South Africa, etc they drove away with Ghana must go bags

Ghana, Cote d'Ivoire, Nigeria did the same thing to African Nationals, the same thing South Africans are doing now. Those who left packed their belongings in the

"Ghana Must Go" bags. All this happened due to a lack of jobs and the Government's inability to create jobs for her growing citizens.

Decades after, Nigeria is in a mess. The oil is going down and the economy has collapsed. The naira has lost all its value and now Nigerians are going to Ghana to study and to South Africa to Look for Jobs, while the children of the corrupt Government personals are leaving Nigeria to Europe and America to study

After years of independence, we remain the third world nation which imports virtually everything, including toothpicks, and keeps at least 100 million of its citizens hungry and thirsty and without electricity every night and day,

At the same time, top government officials crisscross the planet in jets, while Nigerians are in a state of total disrepair. Boko Haram is bombing in the northeast, leaving at least 2 million people homeless and possible jobless for ten years now, more cornucopia of other problems, including escalating unemployment rates and ravaging and skyrocketing corruption.

This is in addition to a complete state of insecurity, with the mysterious herdsmen wreaking havoc in at least 15 states and leaving only devastation and bloodshed behind them.

But amid that chaos, government officials, many of them extremely corrupt who care more or less for the Nigeria citizens

So you see the issue of Job Quest Among The Africa Nationals Has Over Due, YET Africa Leaders are busy doing nothing in addressing the unemployment among they nationals

Unknown to the Africans National, driving out African immigrants from South Africa, from Nigeria, Ghana, etc will not give the African Nationals the education and jobs they need to take care of their families, live their dream life and have the 21st-century jobs. **Diversity is the solution**

38

Yet the Governments of Africa National are busy doing nothing in creating jobs for her citizens but very busy in stealing from the masses this is much reason you in person should take the gigs economy very seriously. May God Help Africa

How To Find Jobs In Nigeria. So Let Get This Done Step By Step

To find jobs in Nigeria you need to **stay informed** on the job vacancies job board, I have early on this report given out a list of a job board for local and international job listing, you can refer to them, but first to get started

Make sure your CV is up to date, *your real names, active email address, active mobile phone number, virtual passport, and traceable home address* are all included in your CV and cover later. Once you have gotten your CV Right then you are good to go

So the next question is how do you go about it? finding jobs in Nigeria

If you remember, I once gave out a keyword FOR Employment Firm, you can easily refer back to it, you can use those keywords to search for employment firm in any state in Nigeria using google.com

While searching for the employment firm, try to build a database of employment firm and remember, the essence of you building this database is to mail them your CV and Cover later. Yes, that is the essence. To mail them your CV and cover later. Not just to mail alone, but to mail to them and follow them up, at least ones or twice follow up message after some few days or week you have sent your CV and Cover later to them

Another Way To Find Jobs: In Nigeria Is by staying Inform On The Federal and State Government Jobs listing nationwide. There are over 100+ federal government jobs in Nigeria you can apply for.

Some of the jobs are for young graduates while others are for experienced workers.

HERE ARE TIPS ON HOW TO HUNT FOR FEDERAL GOVERNMENT AND STATE JOBS IN Nigeria

Before you start applying for jobs in federal government Nigeria, Choose a position for which you are qualified, Each federal recruitment announcement provided accurate information about the requirements, training, and experience necessary for each job. The reality is that to hire you must meet all the requirements

Complete The Entire Form

An incomplete application will not be taken into account, without exception. You must fill out the entire online or offline form and answer all the necessary questions, with letters of recommendation and others. It is also very important that you send the job application on time or before the closing date

Last: Always stay inform, to get the latest update on Jobs and Recruitment offers on Both Federal and state government levels, you can stay informed by visiting <https://advert.ng/> jobs section and that of nairaland.com jobs section and other job boards on the internet. You can also stay informed by visiting a cyber café and having a cyber café operator as a friend. And many more

You can also find Jobs from Private Own Organization, NGO, Companies and Business Outlet, etc using the spartan methods I mentioned earlier.

Its easier to find jobs in Private Own Organization, NGO, Companies and Business Outlet, etc in your area, the question is are you ready to accept the nation of the jobs, as some of this jobs can fall out of your discipline and type of your dream work, while some may be inline with you kind of work. but in all, if the odds of finding a good job is against you and you think you can do better as an entrepreneur.. then Self-inventory may be an option

The Self Inventory, Become An Employer of Labour

When the job hunting of a thing is not working for you, you may need to think outside the box, maybe self-employed, entrepreneurship may work for you

Due from my personal experience, it's easier to find a job than becoming a self-employed and harder becoming an entrepreneur

Yes it's even harder to be an entrepreneur in Nigeria as everything seems to be against your success, the Government policies, The lack of electricity, etc all seems to be against your success, so if you are planning to become an entrepreneur here in Nigeria, you should be ready for war, if you want your entrepreneurship career to be at peace, you should prepare for war, for that is the only way to have peace at your entrepreneurship career

And you should know that becoming a self-employed, entrepreneur is not for everyone and becoming an entrepreneur doesn't make you a boss as you will still have people you are answerable to, people you will still address as Sir and yes Ma

Yes self-employed may be ok for those who are not desperate to settle for less by becoming underemployed in a job they will resent

And to some raising the capital and to sustain self-employment career may be difficult when the Nigeria Government is overtaxing the citizens, thereby making entrepreneurship unnecessarily hard in Nigeria, some may say that entrepreneurship is overrated in Nigeria and it's a ploy used by the Government to cover up their inadequacies to create jobs for her growing citizens but in between those chaos, if you can think outside the box if you can think of an idea if you can put it into action if you can plan it. you can make it

Many have taken the part of entrepreneurship, few have made it many have failed, some are still struggling to make it, but believe me, you can make it if you try. With good planning yes you can

Being a successful entrepreneur requires you being very smart, that when the going is hard you need to go harder and when the going is ease you still need to go harder this are few things I have to learn from self inventors, like **Jack Ma**

Jack Ma! himself who made a fortune via e-commerce, was a formal English teacher who went ahead to be rated Forbes richest man in China, China with over a billion population he was rated the richest among them. the same way Aliko Dangote is rated the richest man in Africa.

Jack Ma who was once a job sicker before he became a self-inventor, known as the father of e-Com (e-commerce) founder with over #21 billionaire worldwide in 2019, #21 most powerful person in 2018, #7 richest person in 2017 among other caps, stepped down from his role at China's largest company on his birthday in September 2019 after amassing a \$41.8 billion fortune with the wealth been generated largely via e-commerce

Jack Ma in an interview with Bloomberg Television said while governments will be responsible for administering the African Continental Free Trade Agreement which has a target starting date of July, business leaders will have to find practical ways on how to connect consumers in disparate markets.

Today Jack Ma (alibaba.com) fortune according to Forbes stands at \$39.5 Billion as of today. He was once a job hunter and was considered too ugly to get a hotel job. Rejected by many employers. but decided to go into eCom after he discovered the internet in Seattle, United States, In 1994

He moved in founding alibaba.com, the world-renowned internet trading platform now worth billions of dollars. He always tells the young tech and entrepreneurs to work smarter if possible use his idea of the four Es: e-Infrastructure, e-Entrepreneur, e-Government and e-Education

Remember Jack Ma was once a job hunter and was labeled too ugly by employers so was unable to get a hotel job before he funded www.alibaba.com

There are many of his kind, am also in love with another self inventor in the person of Jeff Bezos

Jeff Bezos is an American internet and aerospace entrepreneur, He is best known as the founder of Amazon.com, Inc. Amazon with thousands of direct employers and millions of indirect employers both on amazon.com and Amazon AWS in which am part and beneficial of such a great community.

Jeff Bezos was able to think outside the box and today he is an employer of labour

The reality is that no Government on planet earth if left alone can provide jobs for her growing citizens, so we need more of the inventors, the Government can only strive in making the environment, policies and economy conducive for all.

Becoming a self inventor is more vital to all, we know the stories of **Mack Zuckerberg** the co-founder of Facebook, Inc, **Bill Gates**, **Warren Buffett**, Our own **Aliko Dangote** GCON, Aliko Dangote is the richest and possibly the top private employer of labour in West Africa and owner of the Dangote Group.

The list is endless as my own homes in the person of **Seun Osewa** the owner of Nairaland.com, Nairaland.com being the **No1** Forum in Africa, Seun Osewa was

able to think outside the box as far back in the year 2005 when he launched www.nairaland.com

The stories not ending there, As **Akin Alabi** the Nigeria entrepreneur turn politician, philanthropist and the founder of Nairabet.com, Nigeria's first sports bookmaking company.

Our top blogger in the person of her Her Majesty Queen **Linda Ikeji**, I hope you are aware of her, she is a blogger, an entrepreneur who was able to think outside the box, one thing I love about Linda Ikeji is the fact that her success started with her but never ends with her alone. her success influences her entire family, no member of her family is said to be poor or jobless, from her father to her mother, in fact all her siblings became millionaires through her. that is the power of thinking outside the box, becoming an entrepreneur

We have more and more people who have achieved great success as an entrepreneur despite all odds, so you too can if you give it a try, but before you get started, learn to prepare for war. That is! if you want entrepreneurship peace of mind, you have to be prepared.

46

Friends by every mean necessary get a job, do all your best, your very best to find a job, locally or internationally leveraging The Gigs Economy, but should in case

all means to find your dream job failed you, please don't be idols, as an idle man is a devil workshop

If you tried all means to get a good job in less than 21 days and all means failed you while waiting for the fortune day, a day of favour, please try teaching jobs. Yes teaching job or if you are a man below 40 years, you can combine trying teaching jobs and labourers jobs, just for the main time, in other to keep the body and soul together. What am trying to say here is that you should never be an idol and by every means necessary find a job, even do it is a low pay job

You must not wait for federal government job, state government jobs, local government jobs, jobs in banks, jobs in an oil companies, top privates companies in Nigeria, etc, you must not keep waiting on them, by every mean necessary get your self a job, even do if it means you enter the street and hustle for teaching jobs, labourers jobs, and am sorry even bricklayers jobs where they are building houses, that is if you body can carry stress, you may just accept such jobs while you keep your heads up and hunt for your dream work and a better-paying jobs using the information I have provided in this book [How To Find Job](#)
